9 Signs It's Time to Breakup with Your Backup

1. Vendor's DNA is appliance-centric
2. Locked into vendor's cloud
3. Disaster-recovery-as-a-service (DRaaS) isn't built-in
4. RTO takes days
5. Cloud storage is tethered to appliance storage
6. The appliance functions as a purpose-built appliance
7. Can't treat mission-critical data distinctly
8. Can't protect all of your company's data
9. Pricing is complicated and confusing
