Why do you need to test your disaster recovery plan?

In times of uncertainty IT professionals need assurance that their data is protected. They know that operations can (and will) grind to a halt when natural disaster, employee error, or ransomware attacks occur. These events can happen at any time, especially when you least expect it. It is no longer sufficient to create backups, wait for a disaster, and hope you can recover. The best way to overcome a disaster is to prepare for it... beforehand. Infrascale is here to lend a helping hand!

"40% of those with a fully documented disaster recovery plan admit that it isn't very effective when a disaster does strike!" - Risk of Not Having a Disaster Recovery Plan – RockDove Solutions

Features & Benefits

**EXPERT GUIDANCE**

End-to-End Plan Review
- Detailed review of your end-to-end disaster recovery plan including recommendations for improvement

One-on-One Support

Why Infrascale Guided Disaster Recovery Testing?

Infrascale Guided Disaster Recovery Testing provides validation that your Infrascale Disaster Recovery (IDR) solution has been thoroughly tested and is on standby to quickly restore access to your important data and business processes. The Infrascale team will guide you through the test and execution of your disaster recovery plan, so you are prepared when disaster strikes. Our deep experience with predefined configuration orchestration gives you confidence that your DR setup is optimized, fully tested, and completely operational – and there for you when you need it.

How it works

- Purchase Infrascale Guided Disaster Recovery Testing
- Set appointment time and join 1-on-1 screen share session
- Execute your DR Plan while Infrascale experts observe and evaluate
- Infrascale shares real-time DR testing execution guidance
- Infrascale prepares and delivers Disaster Recovery Test Plan report
- Amend your DR Playbook with confidence of successful, repeat execution

Recommended IDR Guided Testing frequency is determined by business:

- **High risk**: Test every 2 weeks
- **Moderate risk**: Test monthly
- **Minimal risk**: Test quarterly
- **Low risk**: Test once per year

What Makes Infrascale Guided Disaster Recovery Testing Different?

- Technical guidance provided by Infrascale experts that have managed thousands of IDR deployments, in a wide variety of customer environments
- Individualized, customer approach; one-to-one support staff interactions using shared desktop methods
- IT administrator peace-of-mind and confidence that the organization’s mission-critical information is safe from ransomware attack, hardware failure, and natural disaster

Infrascale Guided Disaster Recovery Testing Pricing:

$200 per hour — 2 hour minimum per site

About Infrascale

Founded in 2011, Infrascale provides comprehensive, cloud-based data protection by delivering industry leading backup and disaster recovery solutions. Combining intelligent software with the power of the cloud, Infrascale removes the barriers and complexity of secure, offsite data storage, and standby infrastructure for realtime disaster recovery. Trusted and recommended by leading independent industry experts, Infrascale equips its customers with the confidence to handle the unexpected by providing greater availability, better security, and less downtime, when it comes to their data.
